\*\*The profits and trades depicted are for demonstration purposes only. They are not a recommendation to buy or sell a particular security. They are shown in order to highlight the capabilities of what the software can analyze and derive by the verification and analysis of historical stock market data if the user had been using this particular trading system @ at the time. It has not taken into account the investment objectives, financial situation and particular needs of any investor. The information contained in this program is not suitable to be acted on as investment advice. It may be advisable to obtain investment advice before making any investment decisions relying on the information obtained from this program. It is not a representation that the software will produce profits (or any profit) on any day. Historical profits are no guarantee of future profits.

## Profit Range: -10.00% to 63.28%

Average Profit of the above trades = **22.43%** over **13.92 Days**

(If you made on average 15% every 3 weeks on the Stock Market and invested all the profits, a \$1,000 starting account would be worth at least \$115,804 in just 2 years!)
